Tabellen 4: Pauschalsätze für die allgemeinen Kostensteigerungen

(Anwendungsbeispiel s. Seite 4)

Gemäss Praxis bei vielen Schlichtungsbehörden können die allgemeinen Kostensteigerungen als Pauschalen aufgerechnet werden. Der Ortsgebrauch ist sehr unterschiedlich. Die Parteien haben das Recht, die Anwendung der Pauschale abzulehnen. Die Mieterschaft kann die konkrete Belegung der Kostensteigerung verlangen, die Vermieterschaft kann höhere Kostensteigerungen mit konkreten Unterlagen belegen.

Die Praxis der Schlichtungsbehörden kann dem Sonderheft «Daten und Adressen zum Mietrecht» von «mietrechtspraxis | mp» entnommen oder unter www.mietrecht.ch (jeweils aktualisiert) unter «Schlichtungsbehörden» abgerufen werden.

Indexumrechnungsformel

Berechnung der Teuerung in Prozenten: Differenz zwischen neuem Index und altem Index, geteilt durch den alten Index mal Hundert.

Beispiel:

Die Zahlen des Berechnungsbeispiels sind aus der Tabelle 1a «Basis Dezember 2020 = 100» entnommen.

Bei der letzten Mietzinsanpassung wurde als Berechnungsgrundlage 101.7 Punkte (Jan. 2022 auf der Basis Dez. 2020 = 100) angegeben. Die Mietzinsanpassung wird im Juli 2024 mit dem aktuellen Indexstand (= 107.5 Punkte) vorgenommen.

Berechnung

$$107.5 - 101.7 = 5.8 / 101.7 = 0.05703 \times 100 = 5.70304\% \text{ Teuerung.}$$

Davon dürfen max. 40% ($5.70304 \times 40\% = 2.28122\%$), also 2.28% auf den Mietzins überwälzt werden. s. Tab. 3a (Jan. 2022)
